PROJECTS

[MenKeVichar ↗](#)

Oct 2024 - Dec 2024

The Digital Journal is a full-stack web application built using the MERN stack, designed to help users record and manage their daily thoughts, experiences, and memories. Users can create, update, and delete journal entries while also uploading images to personalize their content. The application ensures a smooth and intuitive user experience with a React-based frontend and a Node.js/Express backend, with MongoDB handling data storage. Additionally, Cloudinary is integrated for efficient image uploads.

[Spotify-clone ↗](#)

Feb 2024 - Mar 2024

This project is a clone of the Spotify user interface, meticulously recreated using HTML and CSS. It aims to mimic the look and feel of the popular music streaming service, providing a similar visual experience and layouts

[WanderLust ↗](#)

Jan 2024 - Mar 2024

Wanderlust is an Airbnb-inspired web application that allows users to explore, book, and list accommodations for their travels. Built using Bootstrap, EJS, Node.js, Express, and MongoDB, this platform provides a seamless experience for travelers and hosts.
